The Tipton County Museum, Veterans Memorial & Nature Center  
Presents a Four Week Art Class

# Pablo Picasso: *Life at Its Fullest*

With 2017/2018 Artist in Residence

## *Richard Reed*

Pablo Picasso was known for his many periods in art history, including cubism and surrealism. During this four week course, Richard Reed will lecture about this famous artist, and lead the class in recreating four of Picasso's famous paintings, each from one of his different phases. Artists may paint in the medium of their choice and will provide their own supplies. No previous art experience required.

When: Tuesday Evenings, 6 to 8 p.m., August 27, September 3, 17, & 24, 2019

Where: Tipton County Museum, 751 Bert Johnston Avenue, Covington, TN

Fee: \$60 Museum Members, \$80 General Public

## Progress Meeting Notes

**Date of Meeting:** 6/19/2019  
**Project:** LED Lighting System  
**Subject:** Progress Meeting  
**Meeting Location:** Covington Municipal Airport  
**Barge Project No.:** 3193514

---

**PARTICIPANTS:** See Attached

**Copy to:** Participants, Jim Currey

---

### ITEMS DISCUSSED:

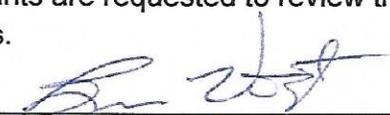

1. **Safety Moment** –
  - a. The work is on an active airfield, no work should occur on the operational areas without prior notice and proper escort
  - b. All vehicles on operational surfaces must have rotating or flashing lights or be escorted by a vehicle with rotating or flashing lights
  - c. Shelby Electric must provide continuous cleanup of debris and Foreign Object Debris (FOD) control
  - d. Barricade flashing lights shall be maintained by the Contractor
  - e. All closures must be planned and coordinated with the airport and the RPR. A prior notification of a minimum of 48 hours must be given for runway closure.
  - f. Equipment parked overnight must be outside the runway and taxiway OFAs (object free areas).
  
2. **Contract Time** – Contract Time is **90 Calendar Days** (75 original with Additive Alternate 1 + 15 supplemental agreement). NTP was given for 5/20/2019. Work started for 2 days and then was halted waiting on delivery of remaining material. Work restarted on June 3<sup>rd</sup>. Today is day 17.
  
3. **Project Communication** – Barge Resident Project Representative (RPR), **Curtis Underhill / (901) 239-4292**. Shelby Electric's Foreman, **Ray Overbey / (901) 212-6845**

4. **Work Completed / Underway** –
  - a. South TW lights, 5k and counterpoise lines currently being installed
  - b. Bore complete under runway
  - c. South PAPI light wire pulled, 75% complete
  - d. Delivered helipad fixture type to be verified by Chris. Delivered fixture does not appear to be stake mounted as specified.
  
5. **Planned Work** –
  - a. Complete south TW lights, construct sign pads and install signs outside of RSA
  - b. North TW lights, and signs
  - c. Demo current signs/pads and backfill
  - d. Install windsock on TW circuit
  - e. Begin RW light replacement
  
6. **Construction Schedule** – An updated construction schedule was requested
  
7. **Current Submittals** – None pending
  
8. **Change Items Tracking** – None
  
9. **Current Requests for Information** – None
  
10. **Payment Application Status** – Pay App #1 was rejected by TDOT
  - a. Pay app #1 has been resubmittal and is being reviewed by engineer.
  
11. **Onsite Construction Meetings** – Anticipate next progress meeting in 2-3 weeks as needed

## 12. Additional Discussion –

- a. Ray – none
- b. Chris – none
- c. Brian Hale – Noted nearest edge distance of direction and hold bar signage to be 10' - 20' from edge of pavement. Additional note in follow up email - *The AC allows the near side of Size 1 Hold Signs to be between 10' and 20' from the defined edge of TW pavement. The standard location in the other direction is in-line with the Holding Position Markings on the taxiway. A tolerance of up to 10' further away from the runway centerline than the holding position is allowable.*
- d. Curtis – Will confirm sign placement in field. Suggested testing TW light work before moving to RW light replacement.
- e. John – none
- f. Robin – Inquired if existing PAPI light base was to be used. Curtis responded that if new fixtures are compatible, existing bases would be used. Asked Curtis to confirm REIL light locations. Requested sign pads be poured for RW locations during TW phase to allow for cure times. Requested verification if two of the south signs can be placed on existing bases. Local flight check may be made on PAPI alignment before scheduling FAA flight check.

These notes represent my understanding of items discussed and conclusions reached. Participants are requested to review these items and advise of necessary corrections or revisions.

Signed:  Date: 6/19/2019  
Brian Vogt, Assoc. Project Manager
